

HI-TECH EQUIPMENT FOR PRECIOUS MATERIALS

## PROJECT ENGINEER AUTOMATION ROBOTICA

Buko Nv is a dynamic SME in KORTRIJK specialized in developing total solutions for the treatment of fine materials. We are a strong international player in the niche of the jewelry industry, but increasingly this expertise is attracting other sectors. To support this growth, we wish to expand our team with a project engineer automation/robotics.

### Function

- Robot programming (Stäubli, ABB, UR)
- PLC Programming (Beckhoff) and operator panels
- Customer installation and start-up support

### Your profile

- Industrial engineer or professional bachelor electro-mechanics/electricity/electronics
- Analytical insight
- Knowledge of robots STAUBLI /ABB/UR is a strong plus
- Affinity with vision systems
- Team player
- Basic knowledge of English and French is required

### Our offer

- Exciting job with a lot of autonomy and variety
- A small SME with high involvement of a strong team
- Attractive remuneration package
